

# Safe Driving Tips

- Keep doors locked and windows rolled up.
- Ensure cell phone is fully charged and operational.
- Pay close attention to your surroundings and the behavior of those around you at all times. Especially true when coming to a stop or an intersection.
- Leave ample space between your vehicle and the one in front in case you need to take evasive action.
- If followed or harassed by another driver, look for a safe place, such as a police station, hotel, or other crowded public facility.
- Never exit your vehicle to confront someone.
- Never lead a suspect to your home.

- Beware of strangers driving up alongside you trying to pull you over for some “emergency,” like a flat tire. Instead, drive to a service station or well-lit public area before checking your vehicle.
- Take on a low profile, be inconspicuous. For example, drive an older sedan instead of an expensive vehicle.
- Always keep your house keys and car keys separated. If you do lose your car, you will not automatically place your household possessions at risk.
